

Exhibit "A"

With the funds allocated from the Franklin Redevelopment Commission (RDC), Franklin Community Schools shall purchase 800 technology devices in order to equip all 2015-16 Franklin Community Middle School students. The purpose of providing students with these devices will be to:

1. Enhance literacy, critical thinking, and problem solving skills of all high school students
2. Extend learning beyond the classroom walls
3. Increase student access to information
4. Encourage innovation by both students and teachers

Upon final approval of funds from the RDC, Franklin Community Schools intends to purchase all devices no later than December 31, 2015 with full deployment to all students prior to January 31, 2016. Full implementation of this program has the ability to drive the long term economic engine of the Franklin Community through enhanced student preparation in literacy and technology.
