Miscellaneous: \_\_\_\_\_

**Department Review**

*To be completed internally by applicable City Departments*

**Planning and Engineering Remarks**

This Department does not support the request for additional lights. Street lighting exists at all intersections within this neighborhood as required by the Subdivision Control Ordinance. Additional lighting at the requested locations would require the installation of hundreds of feet of conduit and wiring at the cost of thousands of dollars.

Further, as a local neighborhood street, traffic volumes are very low as are travel speeds. Ambient lighting, vehicle headlights, and existing street lights should be sufficient for traffic safety purposes and nighttime travel.

**Street Department Remarks**

The Street Department is ok with adding street lights, and has no additional comments.

**Police Department Remarks**

It appears that there are sufficient lights in the area since there are lights at all the intersections.

I agree that additional lights in dark areas are a crime deterrent, but it is usually the homeowners that install additional lights such as motion detection.

**Fire Department Remarks**

The Department is ok with adding street lights, and has no additional comments.
