RE: Variance/Special Exception For Indoor Firing of Various Caliber Weaponry For Ongoing Testing, Accuracy, and Calibration of Targetry and New Products for the U.S. Government, U.S. Military, Law Enforcement, and Civilian Markets Via Test Chamber and Multi-Lane Flat Range.

About Us:

Patriot Products, LLC is a designated Small Business focused on supporting the critical activities for the SOF community and also meeting the needs of military, law enforcement, first responder and similar organizations across the defense industry, by developing, producing, and fielding innovative products and solutions in support of the warfighter.

Our dedicated and committed team of engineers, subject matter experts, and trades craftsmen with extensive knowledge of need and results are second to none in this relentless support. Our desire is to listen to our user partners to fully understand their training and mission challenges, designing and creating product solutions, and companioning with our Partners as those solutions need to evolve to meet future flexibility, adaptability, behaviors, and challenges in both traditional and non-traditional environments and elements.

Our range and training products are all customizable, and we embrace new challenges to provide custom solutions and products that synchronize with our Partner's Imagineering and our evolving vision and expertise.

Areas of Expertise:

RANGE & TRAINING SOLUTIONS

- Subterranean/Tunnel Systems – Variable Facades
- Multi-purpose Target Systems – Electronic and Pneumatic
- Ballistic Steel Targetry ~ small arms to aerial gunnery
- Wide Spectrum Ballistic Encapsulation & Protection
- Modular, Indoor/Outdoor Shooting Ranges
- Expeditionary/Relocatable/Reconfigurable Live-Fire Shoothouse
- Specialty Ballistic Steel Fabrication
- Modular/Relocatable/Reconfigurable Training Environments & Atmospherics, Villages & Specialty Training Structures

ROBOTICS – Sniper and Mission Specific

- Multi-engagement ~ Multi-platform
- Tracked/Trackless
- Operator Controlled to Full Spectrum Autonomy

Patriot Products is a world class leader in the design and build of indoor/outdoor Military shooting ranges and ballistic capture devices to include portable bullet traps and live fire shoot houses. One of our designs is now the United States Program of Record and is the Standard both CONUS and OCONUS for all US ARMY Live Fire Shoot houses. Our expeditionary live fire shoothouse design has been fully safety certified by US Naval Facilities Engineering (NAVFAC) for DEVGRU (SEAL Team 6) and all SEAL Teams.

While we currently have this variance at our present location on 3022 Hudson Street, Franklin, the new proposed location at 1399 Earlywood Drive, Franklin, offers us even more discreetness and security measures in some of our higher sensitive and classified work for our Government clients due to its even more remoteness and area land size.

Our Flat Range design will be incorporated with standards such as:

- Deceleration Chambered Traps (no accumulated spent rounds in rubber)
- Completely baffled sound attenuation in ceilings and walls
- Ballistic baffled ceiling
- State of the Art sophisticated Air Handling – IDEM Monitored
- IDEM Certified Lead Handling Removal and Manifest Record Keeping
- Sanitary Facilities
- Far away from main city businesses
- Focused support accessories

An additional bonus is we may be able to offer the men and women Law Enforcement Officers of Franklin City and Johnson County Sheriff's Department a safe and local environment marksmanship state of the art training range in addition to their current training facilities.

The Range, while private, would operate under all strict federal, state and local requirements and regulations, including safety, insurance, record keeping and reporting requirements.
