We have based our Fee Proposal on the aforementioned assumptions. The following Scope of Services is designed to assist you in the development of this project:

Included will be information such as one foot contouring, existing street elevations, existing sanitary and storm structures, and verification of existing utilities. This survey will also all research, office work, and field work necessary to re-establish the existing Right-of-Way throughout the length of the project.

B. PRELIMINARY PHASE

After the survey is completed, we will prepare a preliminary layout that will identify the existing site amenities and will identify proposed project features such as the proposed street improvements, sidewalks, drainage structure improvements, lighting, etc. Once the layout has been completed, we will meet with you to discuss and make any necessary adjustments. This plan will then be used to complete the design of the project.

C. DESIGN & CONSTRUCTION DRAWINGS

We will design all of the elements of the development necessary to insure the workability of:

- Street improvements
- Sidewalk, ramps, crosswalks
- Storm structures as necessary
- Drainage and grading
- Street and walk lighting

Construction drawings will be prepared in accordance with all state and local laws and ordinances and will include the following:

- Storm structures & drainage
- Profiles, Grading & Construction Details
- Erosion control plans
- Maintenance of Traffic Details

D. REGULATORY SUBMITTALS & BIDDING PHASE

We will prepare the necessary applications for submittal and review and/or approval of the construction plans prepared as part of this agreement. This task will include engineer's estimates as well as the necessary administration services for preparing the submittals as well as time associated with the coordination efforts with the local regulatory agencies. This work will also include the services necessary to facilitate bidding of the project.

E. CONSTRUCTION STAKING, INSPECTION & AS-BUILT PLANS

Once design is complete, CrossRoad Engineers will perform construction staking, inspection, and as-built plans for this project. This work will be provided on an hourly basis with a Not-to-Exceed amount as indicated herein.

During the 2014 construction season (estimated 3 months), we have budgeted 8 hours per week for the Director, 50 hours per week for the Resident Project Representative, and 45 hours per week for the half of the project duration for the Project Inspector. We will also be providing construction staking services and provide as built plans once the project is

completed. All of this will be performed on an hourly basis in accordance with the attached schedule of hourly rates.

F. METHOD FOR PAYMENT OF ENGINEERING FEES

During the course of this work, progress invoices will be prepared for the portions of the work done to date based on the Fee Schedule included with this document as Attachment "A". Prior to preparing these invoices, we will contact you to discuss the amount of work that is complete and, therefore, the dollar amount that each invoice will be. These invoices will be submitted by the 5th of each month and will become due by the 30th of that same month. Invoices not paid within 30 days after submission to you will accrue interest at a rate of 1.5% per month.

G. UNDERSTANDINGS

For additional services not covered herein, the work will be performed as authorized by you at a mutually agreed upon rate. Also, should the City decide to cancel the project at any time on the phases worked on up until that time will be invoiced.

Items not included are acquisition of building permits, sanitary sewer connection permits, regulatory fees to accompany permit applications, and permits normally obtained by the contractor(s). Payment for these items will not be the responsibility of CrossRoad Engineers.

We are ready to begin and appreciate your allowing CrossRoad Engineers to design this project for you. If you have any questions, please call me at 780-1555 ext. 114.

Sincerely,
