Address: 943 Redwood Dr Franklin In 46131

Describe Request

I am presenting a huge holiday light show on the Friday after Thanksgiving at 5pm and I am requesting to block off the back corner of my addition from Bridlewood , Blackthorn, and Cedarmill. They all end into Redwood Dr where I will be presenting my holiday show. The HOA is on board as long as I can get traffic control covered which is why I am coming to you. Captain Scott Baker (i believe) told me to go to the city hall and they gave me this information to contact your board. I have over 100 people already stating they will be there and I feel it's my responsibility to protect the children and people in General. Any police presence would help also to defer people from coming down the street. Any help you can give me would be greatly appreciated. This initial show should only last a couple hours at max so I (if allowed) could always move the barriers after the show. After that the show will be available to listen to from your vehicle on your FM radio.

List Supporting Documentation Provided:

Who will present the request?

Name: Donald Miclette

Telephone: 317-599-6189

Jayne Rhoades

Jayne the area he would like to block off would affect about 25 homes and unsure if he has gotten permission from all the neighbors or just HOA. Also being a city holiday who would be placing and removing the barricades as well as providing traffic control. I really do not like blocking off that many residences unless the road was clear of vehicles and just had people in that area. The other issues would be street and police related and would like to hear their comments.

Our night shift is already scheduled with minimum staffing for Nov. 26th. There a few guys who are taking benefit days to be with family. We would not be able to guarantee any police presence and certainly not for up to two hours. It is not feasible for us to offer traffic control for 3 different intersections. I personally am not a fan of this idea as it pertains to city resources. I do however appreciate his willingness to put on a light show to entertain the community. I think that can be done and people can watch from their yards, sidewalks, and street without straining our resources or creating a potential safety bottleneck.
