City of Franklin

Street Department Memorandum

Date: September 7, 2012
To: Janet Alexander, Clerk Treasurer
From: Ron Collins, Street Commissioner 
Subject: Purchase of Used Scrubber/Sweeper

Janet as part of my continually quest to upgrade the efficiency & overall condition of the Department personnel and facilities; I have been looking for a good used industrial scrubber/sweeper that could be used inside the main garage area of our facility.

There are many reasons why we should have a unit like this but for sake of rambling I will only list a few as follows:

1. Do to the nature of the summer work we perform on a daily basis, we tend to bring large amount of dirt inside our facility. This can cause health problems to the employees that may take years to surface which can lead to staff being absent from the work place which can lead to less productivity for the department.
2. Do to the nature of the winter work we perform on a daily basis, we tend to deposit large amounts of water, that due to slope of floor and floor drains, remains pooled on the facility floor which creates a very slippery surface that creates a safety hazard for all staff members or vendors visiting our facility.

I have found a very exceptional used scrubber/sweeper here in the Franklin area for \$13,500.00. It is a 1999 production model with 91.9 hours of operation. I have attached photos that I took of the unit to verify it overall condition.

I have attached supporting documentation that shows similar units by various manufacturers ranging from \$13.5K to \$23.9K. All of the other scrubber/sweepers found are located outside the State which would require an inspection trip to make sure what we were getting for the money and then freight cost to bring it to Franklin which would average around \$1200-1400. A new scrubber/sweeper like the used one found would cost \$29-37K depending on options we selected.

It is my professional opinion that the City of Franklin Street Department will not find a better product for the dollars being expended.

If you have any questions please contact me.

70 Cotton Yarns
61, 400 Square Ft Per Hour Coverage

The rugged Corder 110000 loader is equipped with a large 70-gallon collection and recovery tank. The layout in the size scrubber. This translates to increased productivity due to longer run times between dump and fill cycles. Plus, the large recovery bins are easy to access and clean. The ultra-low maintenance system with wide swing pins and nearly 100% water jacket on right turns, leaving the floor unmarked, safe, clean, dry and safe for foot traffic. The patented no-tooth side-sweepage blades wipe the floor before the wheels to the machine never rubs through any water streaks.

The Tri-Drive™ symbol features unique traction control for use on floors with low friction resistance. Pressure on the friction control switch requires the drive wheel to turn, which provides increased control and enhanced traction on the floor. This allows for a steady grip and improves overall safety. One-Touch™ switching controls minimize operator fatigue and provides a wide range of performance.

Advance Retriever 4600B

Used Rider Floor Sweeper

This machine is available **REFURBISHED ONLY**.

Available for purchase a number of Nilfisk Advance Retriever 4600 Rider Sweepers. This floor sweeper is definitely an industrial grade piece of equipment. The Retriever 4600B sweeps a 46 inch wide path with its standard right hand side broom and it covers up to 115,000 square feet per hour. The cylindrical main broom throws heavy and light debris forward into a large, hydraulically actuated, 15 cubic foot steel hopper. Air passes through a reusable filter to eliminate dust before it is exhausted back into the environment. The "saddle bag" battery pack makes changing the batteries quick and easy for uninterrupted sweeping.

Advantages:

- 46" sweeping path - 34" main broom w/ 21" side broom.
- Battery Operated: liquid cooled G3 engine, Self-protecting engine shutdown, and electronic fuel injection.
- 5 cubic hopper - tilts so operator can view side broom.
- 6' dump height
- 75 square foot dust control paper filter w/ shaker motor.
- 74 dBA
- Adjustable operator's seat - 6 inch motor steps with the operator gets off the driver seat.
- Heavy gauge reinforced steel frame.
- 3,500 RPM dust control vacuum motor.
- One-touch electronic controls are simple to use and maintain.
- Warranty: 2 months parts and labor.

Refurbished Equipment Available (x2 available)

Refurbished Tennant 8300 Sweeper and Scrubber in 1

This Tennant 8300 Sweeper and scrubber has been refurbished and is ready to make your facility shine!

Functions can be used separately allowing you to sweep or scrub your facility or use both at the same time for a pre-sweep before you scrub on the very same pass.

We had the battery in this machine load tested and certified. Under a full maximal load it lasted 3 hours. That is equivalent to having every function the machine running and working as hard as it possibly can. For example the brushes would be set to the maximum amount of down pressure, driving as fast as possible, sweeping, running both the dry vacuum and squeegee bar vacuum and honking the horn constantly. Hardly a real world scenario! So with the more variables you change to lighten the load on the machine, the longer the battery will last. This is actually considered an 80% of new battery.

Features

The battery powered 8300 introduces patented sweeping technology combined with legendary scrubbing productivity to set a new standard for sweepers/scrubbers. Experience ATS Sweeping Engineered with the new Anti-Technology Sweeping (ATS) system, the 8300 deploys a 10 inch 250 mm dia. brush with an 8 inch 205 mm dia. directional cylinder to sweep debris into the hopper without brush churning. From crushed pavement to road salts, bolts and nails, debris is swept in advance of cleaning. TuffGuard side brushes follow the sweeping path to 6 inches/150 mm, making the 8300's productivity unmatched in its class. Side-sweeper capacity. The ATS system uses the entire hopper space by sweeping debris to the front of the hopper. In fact, the smaller 8300 hopper holds 300 lbs/136 kg of debris, providing plenty of capacity with a long wheelbase length. It's the X-Smart-Trigger™ with a microprocessor keeping a level as it jumps up to lift 1500 mm, rotating 160 degrees, the hopper then senses swivel on the way down, adding debris into place. Legendary Tennant productivity with a 57 gallon/214 L volume tank and a 74 gallon/280 L recovery tank. The 8300 scrubbing capability matches its generous sweeping capacity. Add the ES™ option with detergent metering system, and scrubbing time extends up to 120 L increased Run-Time and Safety Extra large-sized batteries increase run time to 1800 min. Add a 40 inch/102 mm scrubbing path and a coverage rate up to 10,000 ft²/5,600 m²/hr, and the 8300 delivers maximum productivity, low on dirt and grime, the 8300 is easy on the operator, however, power steering is standard, along with one-button scrubbing, on-board diagnostics, and a LCD system, no-tool brush, squeegee and filter changes make maintenance a snap. The new Model 8300 redefines sweeping and scrubbing all expectations and redefining cleaning excellence for years to come.
